ENGINE

NEWVESSELS

The fishing boat, motor, technologies and gear – all are needed to make fishing work. Fiskeri Tidende hauls in all the news in a new magazine, which will be published four times a year.

The magazine is called ERHVERVSFISKEREN. It is a high-end editorial publication containing sterling descriptions of the technical side of commercial fishing.

We focus on equipment of all kinds and the technologies on board fishing vessels – gear, propeller, motor, trawl, winches, fish cleaning machines, ice machines, sonar, radar, AIS, EPIRB and much more besides.

We intend to follow the progress of refurbishments and new shipbuilding projects. We aim to raise the bar higher and bring you a new universe, in which you can immerse yourself in the technical side of the commercial fishing.

If you are interested in technology, gear and equipment, this is the magazine for you!
